

# Windscreen de-icer

with spray pump

## Description:

**Windscreen de-icer** is a de-icer and defroster with cleaning effects based on an alcohol mixture.

The **Windscreen de-icer** thoroughly removes frost and ice from windscreens, outside mirrors, and headlights. Suitable for standard types of glass as well as polycarbonate windscreens.

The **Windscreen de-icer** contains a mixture of alcohol and glycol, and brings a clear view during all weather conditions without streaking.

## Usage:

Remove loose snow and ice with the ice scraper or hand brush. Spray from top to bottom at a distance of approx. 15 cm. In doing so, hold the container upright. The thawing effect sets in immediately.

## Contents:

- **Windscreen de-icer** contains a mixture of alcohol and glycol.
- Colour: blue
- Odour: mild
